To Be Signed After Consultation:

I understand that the criminal record may still be divulged in error by agencies in possession of the record even after the expungement or sealing has been entered by the court.

I further understand that there are private companies that collect public information such as criminal records and store the information in a database. The information may still continue to be in that database even after the expungement or sealing and these companies may be under no legal obligation to delete the record from the database.

Finally, with the Internet the information regarding the criminal record may still be found.
